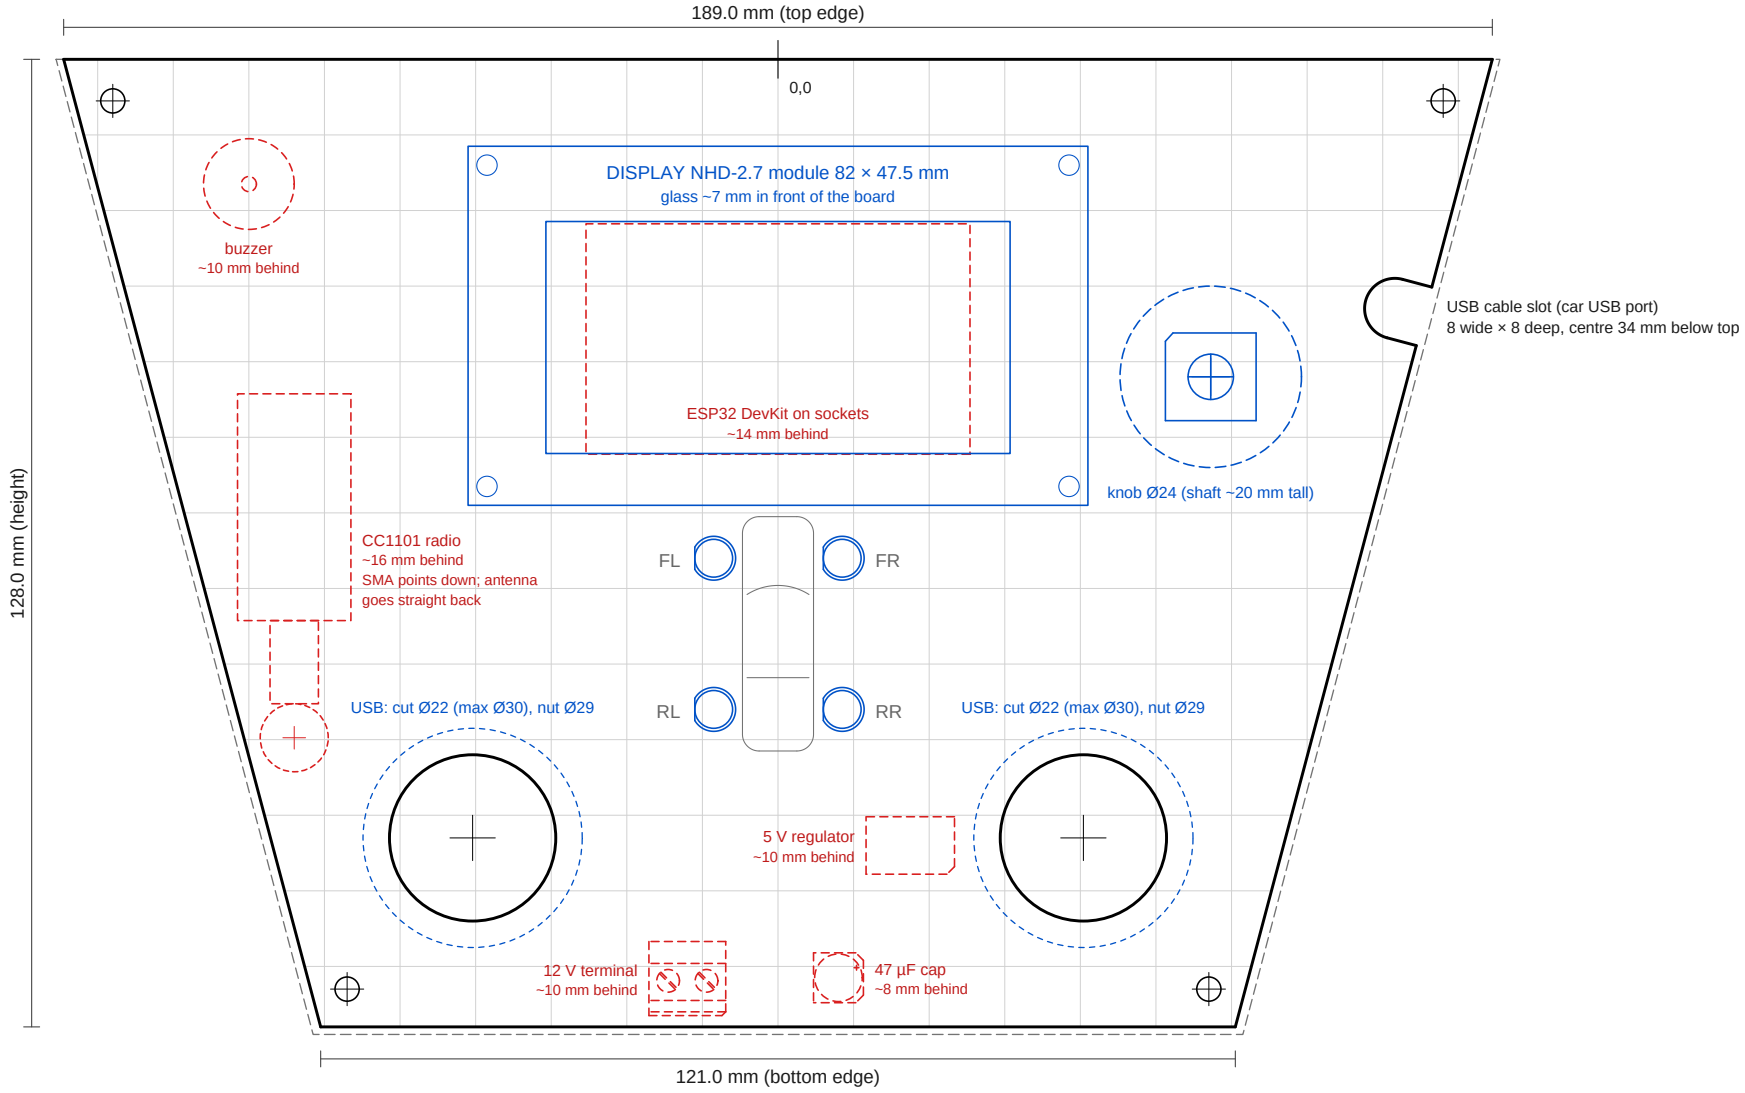
TPMS panel - 1:1 fit template (front view, as seen from the driver's seat)

outline accepted from the in-car fit, board 1 mm smaller on sides and bottom - generated 2026-11-09 from tpms_panel.kicad_pcb - print at 100% / Actual size, NOT 'Fit to page'



100 mm (measure: must be exactly 100 mm)

4 in (must be exactly 4 inches)

How to use: print at 100% / Actual size and check both bars with a ruler.
Cut along the thick black lines and hold it in the dash from the driver's side.
Grey dashed = the opening it was matched to in the car (2026-11-09).
Sticks out in front: display ~7 mm, LEDs ~9 mm, knob ~22 mm.
Behind: up to ~16 mm; the CC1101 antenna connector points down and the antenna goes straight back into the pocket (90 deg SMA adapter or cable).

- thick black = cut line (board edge, USB holes); small circles = M3 holes
- grey dashed = car opening (paper fit); the board is 1 mm inside it
- blue = front parts: display, LEDs, knob (dashed), USB nut (dashed)
- red dashed = tall parts behind the panel (depth noted)
- grey = silkscreen; light grid = 10 mm

Feature positions, mm from top-centre (x right, y down, front view):

display module centre: (+0, 35.25)
knob / encoder shaft: (+57.25, 42)
LED FL: (-8.5, 66)
LED FR: (+8.5, 66)
LED RL: (-8.5, 86)
LED RR: (+8.5, 86)
USB socket 1: (-40.4, 103)
USB socket 2: (+40.4, 103)
mount hole H1: (-88, 5.5)
mount hole H2: (+88, 5.5)
mount hole H3: (-57, 123)
mount hole H4: (+57, 123)

TPMS panel - 1:1 outline only (trace onto cardboard or cut)
